

ResolveScope Claim Intake Form

Case ID: CLM-2024-00847

Submitted by: Maria Rivera

Submitted at: November 12, 2024 · 9:14 AM

Incident date	November 11, 2024
Approx. time	2:15 PM
Location	Westfield Plaza Lot C
Vehicle	2021 Honda CR-V (Sage Green)
Reported contact	Low-speed reverse-out contact from adjacent stall
Police report	No
Injuries	None reported

Claimant statement

I was moving slowly through Lot C near the right-side stalls when I noticed the aisle was partially narrowed by temporary cones. As I passed the next stall, a dark sedan started backing out and clipped the front-right corner of my SUV. I did not get driver information. I photographed the damage and scene before leaving. The vehicle remained drivable.

Observed damage reported at intake

- Front-right bumper scrape with dark paint transfer
- Cracked right headlight housing
- Detached lower trim piece near the bumper corner
- No airbag deployment and no visible hood deformation
